WEB DESIGNER & DEVELOPER

A committed IT professional with a strong hold on software and web development processes. Passionate about building responsive, functional, carefully-crafted websites that not only look great, but also feel great to use. I have been involved in various IT projects and possess a blend of management and technical leadership. My role stretches beyond that of a developer to that of a user advocate, designer, developer and tester.

SPECIALTIES: Front-End Development, utilizing such languages as HTML5, CSS3, LESS/SCSS, JavaScript, jQuery, PHP, MySQL, XML, Bootstrap and Responsive design

WORK EXPERIENCE:

MULTIMEDIA DEVELOPER STUDENT   **(January 2017 – April 2017)**
Blackberry, Canada
- Contributed in redesigning of Blackberry's Training website (http://us.blackberry.com/support/blackberrytraining/blackberrytraining)
- Developed Blackberry Training Course Catalogue web application, allowing for the automated loading-in of offered courses into a centralized location, and simulating a "shopping-cart" experience upon requesting a quote for selected courses (http://us.blackberry.com/support/blackberrytraining/enterprise)
- Created the BlackBerry Training Contact Us page, to create a more guided experience for customers
- Designed, developed, tested, debugged, documented and implemented applications, internet pages for the BlackBerry Training website, using Adobe AEM and self-built pages (HTML/CSS/ JavaScript)
- Built a library of reusable animation and motion graphics content

WEB AND MOBILE APPLICATION DEVELOPER   **(June 2015 – November 2015)**
Digiwebtech Software Solution, India
- Created website layout/user interface using HTML/ CSS practices with Bootstrap3
- Optimized web applications for maximum speed and scalability
- Ensured that applications are compatible across multiple computing platforms and browsers
- Designed and created relation database schemas

WEB AND MOBILE DEVELOPER INTERN   **(January 2015 – May 2015)**
Digiwebtech Software Solution, India
- Worked closely with as senior team to develop creative solutions taking into consideration the technical, organizational, schedule, and business requirements
